## AN ALTERNATIVE AGGREGATION FOR BRANCHES

### Old and New Classification Methods

The Office of Education has become aware, over the years, that the trend toward multicampus institutions and entire systems of institutions, with the various units offering programs at different levels, has made it increasingly necessary to identify the level of program in each of those units separately, instead of following the traditional practice of a single identification for an entire conglomerate of units. This need was made even more insistent by the increasing demand for analysis of institutional operations and for the capability of making interinstitutional comparisons on the basis of homogeneous groups. Therefore, beginning with the year 1971-1972, the Office of Education began classifying the constituent units of all multicampus and multi-institutional entities separately, thus making it both possible and mandatory that, by fall 1972, the separate entities be surveyed individually.

One of the problems that always face those who deal with descriptive statistics is that any changes in classification or method of aggregation make for difficulty in the maintenance of trend data. The usual course in such cases is to report data on both bases for a transitional interval so that analysts and other users may become familiar with the manner in which a change in classification changes the data. Therefore, while the trend data in the main body of this report are unchanged from previous practice, this appendix presents data aggregated on the basis of giving each individual unit--independent of its parent institution--its separate and appropriate classification. Future publications will use such a system for the trend data. This does not destroy historical continuity since it is possible to reaggregate these according to the old, conventional system of classification for comparing trends. Because of lack of data classified in this manner for fall 1971, all trend tables in this publication use the traditional aggregations.

To achieve maximum comprehension of the differences between the old, traditional method of aggregation and the new method, institutional units that have changed their classification in the new system of aggregation have been made easily identifiable. Six separately identifiable classifications of institutional units have replaced the former three. Thus, instead of simply universities (including all their branches), other 4-year institutions (including all their branches), and independent 2-year institutions, six classifications of institutional units are now identifiable--the three original classifications of institutions plus three additional classifications for branches of institutions: other 4-year branches of universities, 2-year branches of universities, and 2-year branches of other 4-year institutions.

These six classifications are identified by numerical code, as follows:

1 - university (including only those branches classified at the university level)
2 - other 4-year institutions (including only those branches classified at the other 4-year level)
3 - 2-year institution (including only their own branches)
4 - 4-year branch of university
5 - 2-year branch of university
6 - 2-year branch of other 4-year institution

The first three codes, of course, include branches of institutions, if they are at the same level as the parent institution. In the past, branches have always been aggregated with their parent institutions, but now the capability exists to aggregate them either with their parent institutions or with institutions and branches at the same (program) level:

| Before | After |
|---|---|
| university = 1 + 4 + 5 | university = 1 |
| other 4-year = 2 + 6 | other 4-year = 2 + 4 |
| 2-year = 3 | 2-year = 3 + 5 + 6 |

The tabulations and discussion that follow consist primarily of data by level of institution aggregated the new way plus comparisons with like data aggregated the old way in order to illustrate the magnitude of the effect that the new method of aggregation will have when data are aggregated by level of institution. In addition, tables 102-111 in the main body of the report are also aggregated by level of institution in the new way.

Numbering of the "New-Method" Tables

Tables 102-111 present enrollment data tabulated by the "new method" of aggregating 4-year and 2-year branches of institutions with institutions at their respective (program) levels. This series of table numbers was selected for two reasons: (1) the "100" part of the series sets them apart from other tables in this report, all of which are aggregated according to the "old method;" and (2) the "02" through "11" part of the series indicates that these tables parallel tables 2 through 11 of the report and differ only as to the method of aggregation by level of institution.

Table A-1 presents enrollment data separately for each of the six institutional categories, by public and private control, and gives, also, the number of institutional units in each category. When institutional data are aggregated the new way, as opposed to the old way, universities lose both 4-year branches and 2-year branches and gain nothing. Other 4-year institutions gain 4-year branches from the universities, but lose the 2-year branches attached to them under the old way. The 2-year institutions gain both the 2-year branches of universities and the 2-year branches of other 4-year institutions, and lose nothing.

When comparing enrollment data aggregated by level of institution according to the new method with those aggregated by level of institution by the traditional method, the greatest differences in totals occur in the public sector and in the universities category. (See table A-2.) These concentrations, of course, are substantially due to the fact that the greatest number of institutional units involved in the changes are in those groups. In the public sector, when branches of universities are reaggregated with institutions at their own levels, seventy-five 4-year branches and seventy-seven 2-year branches move from the university classification to the 4-year and 2-year institutional categories. The 4-year branches carry with them a total enrollment of 331,582, or an average of 4,421 each. The 2-year branches average 1,143, for a total of 87,980. The transfer of these enrollments from the public university category reduces the enrollment of that category by 17.6 percent.

Enrollment totals in the public other 4-year institutions category are affected both positively and negatively by the transfer of branches to institutional classifications at their own levels. The seventy-five 4-year branches coming from the university category bring a total enrollment of 331,582, while only nine 2-year branches, with an enrollment total of 5,401, are transferred from the 4-year to the 2-year category--a net increase of 326,181, or 14.9 percent for the public other 4-year institutions category.

Public 2-year institutions acquire a total of eighty-six 2-year branches from the universities and other 4-year institutions, with an aggregate enrollment of 93,381, resulting in an increase of 3.7 percent over the traditional method of aggregating branches of institutions.

Within the private sector of higher education the effect of reaggregation of levels of institutions by the new method is considerably less than in the public sector for one obvious reason--there are far fewer branches that are transferred from one level to another. There are twelve 4-year branches of universities to be aggregated with the other 4-year institutions and there are nine 2-year branches of other 4-year institutions to be aggregated with 2-year institutions; there are no 2-year branches of private universities.

When the twelve 4-year branches of private universities are transferred to the other 4-year institutions category, the enrollment change is 26,546, a decrease of 3.8 percent for the university level and an increase of 2.0 percent for other 4-year institutions. Inasmuch as private universities have no 2-year branches, the 2-year institutions are unaffected by stripping the branches from universities. However, other 4-year institutions have nine 2-year branches with an aggregate enrollment of 7,499. Their transfer to the 2-year institutions level reduces the gain for 4-year institutions from the addition of 4-year branches from universities so that the net gain in enrollment for other 4-year institutions is 1.4 percent; the increase for private 2-year institutions is 6.4 percent.

When enrollment data are aggregated by level of institution according to the new method and by attendance status (full-time and part-time), the public universities, of course, are the biggest losers, but they lose relatively more

part-time students (22.6 percent) than full-time (15.9 percent). (See table A-3.) Public other 4-year institutions show a slightly greater gain of part-time students (15.3 percent) than full-time (14.8 percent), but the public 2-year institutions show a comparatively greater gain of full-time students than part-time (4.7 percent versus 2.8 percent).

The pattern of enrollment gain and loss is somewhat different in the private sector, mostly in the amount of gain or loss. Universities show slightly greater relative losses of part-time students than of full-time (4.3 percent against 3.5 percent), and both other 4-year and 2-year institutions have relatively greater increases of part-time students than of full-time. Other 4-year institutions gained 1.2 percent full-time students, compared with 2.2 percent part-time; 2-year institutions gained 5.9 percent full-time versus 8.2 percent part-time.

When the new method of aggregating branches is taken into account in respect to the relative distribution of men and women students, no great surprises appear. The shift of branches away from public universities results in the relative loss of 17.1 percent of the male students and 18.2 percent of the female students. The difference in gain at public other 4-year institutions is somewhat greater--16.6 percent for men and 13.1 percent for women. At public 2-year institutions there is little difference in the relative increases--3.5 percent for men and 3.8 percent for women. (See table A-4.)

In the private sector, the gains and losses of men and women students parallel those of institutions in the private sector, but to a lesser degree. Private universities lose 3.2 percent of their male students and 4.7 percent of their female students. Male students at private other 4-year institutions increase by 15.0 percent and female students by 1.3 percent. In the 2-year institutions, women show a greater relative increase--6.7 percent--versus 6.1 percent for men.

## APPENDIX B
## SURVEY BACKGROUND

### Survey Population

The Education Directory, 1972-73, Higher Education (DHEW Publication No. (OE) 73-11404) was the source for the list of institutions included in the survey on which this report is based.

Institutions of higher education included in this report are classified either as 2-year or 4-year institutions, with universities as a separate subclassification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e.g., ecclesiastical recognition in theological institutions. They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that place considerable emphasis on graduate instruction and have at least two professional schools that are not exclusively technological.

The numbers of institutions in the fall 1972 survey, and for comparison in the 1971 survey, were as follows:

| | 1972 | | | 1971 | | |
|---|---|---|---|---|---|---|
| | Total | Public | Private | Total | Public | Private |
| All institutions | 2,680 | 1,190 | 1,490 | 2,617 | 1,143 | 1,474 |
| 4-year institutions | 1,713 | 455 | 1,258 | 1,680 | 444 | 1,236 |
| Universities | 160 | 95 | 65 | 160 | 95 | 65 |
| Other 4-year | 1,553 | 360 | 1,193 | 1,520 | 349 | 1,171 |
| 2-year institutions | 967 | 735 | 232 | 937 | 699 | 238 |

Inasmuch as more emphasis will be placed on institutional reporting units and less on whole institutions in the future, users of statistics produced by the Higher Education General Information Survey system will find the following tabulation useful for the transition: 1/

| | 1972 | | | 1971 | | |
|---|---|---|---|---|---|---|
| | Total | Public | Private | Total | Public | Private |
| All institutions | 2,945 | 1,410 | 1,535 | 2,893 | 1,371 | 1,522 |
| 4-year institutions | 1,926 | 626 | 1,300 | 1,906 | 626 | 1,280 |
| Universities | 325 | 248 | 77 | 334 | 256 | 78 |
| Other 4-year | 1,601 | 378 | 1,223 | 1,572 | 370 | 1,202 |
| 2-year institutions | 1,019 | 784 | 235 | 987 | 745 | 242 |

1/ Because data for the new 6-level codes as shown in table H, in the text, are not available for 1971, branches in this table have been grouped with their parent institutions.

For the convenience of the reader, the questionnaire used in the survey is reproduced in appendix C of this report. Complete data were received for all 2,680 institutions in the survey, and total enrollment figures for these institutions have been entered in each cell of the questionnaire.

Questionnaire Editing

Each report form filed in this survey was compared with the report form filed by each institution for the comparable 1971 survey, which was identical in format with the form used for the 1972 survey. Large differences in enrollment patterns were accepted if reasons for them were readily apparent. If further information was needed, institutions were contacted by letter and/or telephone for verification, revision, or additions to the figures reported. These procedures undoubtedly eliminated many of the larger reporting errors, but the extent to which small, unrecognized errors may remain is unknown.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded but are given as they were obtained--by simple addition of the figures for individual institutions. This does not imply that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add exactly to the totals. Also, in view of the care with which the data were compiled by the respondents and reviewed by the Office of Education, it seemed appropriate that the totals reflect the individual reports.

## DEFINITIONS

**MULTI-CAMPUS INSTITUTION.** An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

**MAIN CAMPUS.** In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

**BRANCH CAMPUS.** A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

**INSTITUTIONAL SYSTEM.** A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.
